July 17, 2023

Dear potential investors,

The Government of Kosovo is prioritizing and promoting the provision of reliable, affordable, and clean energy, with the goal of achieving 1.3 GW of new renewable energy source (RES) generation capacity. This is done in accordance with our Energy Strategy 2022-2031.

As an initial step to reaching this goal, the Ministry of Economy, with the generous support of USAID, is implementing Kosovo's first-ever RES auction.

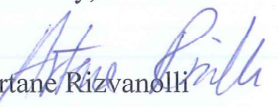

The auction will award a contract for the design, construction, and operation of a 100 MW solar photovoltaic (PV) power plant, to be built on public land in the Municipality of Rahovec, the western part of Kosovo, to the lowest-price bid from the qualified party.

This is an attractive commercial, and environmentally sound, opportunity, with a guaranteed 15-year power purchase agreement, price assurance, streamlined administrative procedures with government agencies, and no land acquisition costs. The site is well suited for construction as it offers favorable terrain for construction and installation, easy access to vehicles and equipment, and a nearby grid connection.

A Prospectus is attached and further information is available via Kosovo's RES Portal (<https://reskosovo.rks-gov.net/auction>). The tender documentation and any clarifications can be requested from salami.berisha@rks-gov.net. The deadline for submission of bids is on 29th September 2023, 14:00 CET, but extensions may be considered if necessary.

The Government of the Republic of Kosovo is committed to ensuring a fair and transparent process, and we hope that you will consider being a partner in our successful energy transition story.

Cordially,

Artane Rizvanolli
Minister of Economy
